Hiring Manager

Re: Lead Flutter Developer / Senior Mobile Engineer

Dear Hiring Manager,

I am writing to express my interest in a Lead Flutter Developer or Senior Mobile Engineer role. With more than eight years of software development experience, I bring strong expertise in Flutter architecture, cross-platform mobile delivery and practical backend API development.

In my current role with IKLIX in Dubai, I lead the architecture and development of Flutter applications across Android, iOS, web and desktop. I have owned product areas including e-commerce, POS, delivery, dashboards and inventory systems, while also developing Python backend services and RESTful APIs that support business integrations.

My background includes payment and third-party SDK integrations such as Apple Pay, Stripe, Odoo, push notifications, maps and geolocation. I am comfortable mentoring developers, conducting code reviews and improving performance, scalability and release stability for production applications.

I would welcome the opportunity to discuss how my mobile architecture, leadership and delivery experience can contribute to your engineering team. Thank you for your time and consideration.

Sincerely,

Hafiz Qasim Ali
